10. Other:		EDDIE LEE SORY PATENT EXAMINATION OF CENTER 2800				

Continuation of 5. does NOT place the application in condition for allowance because: Applicant argues that nowhere in any of the references is there any teaching of using InGaN material for emitting an excitation light as recited in amended claims 1 and 28. However, Ishikawa et al teaches using an InGaN material for emitting an excitation light (col. 16, lines 26-34). The combination of Mooriadian et al and Ishikawa et al would read on the claimed invention since it must be recognized that any judgement on obviousness is in any sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the invention was made, and does not include knowledge gleaned only from the Applicant's disclosure, such a reconstruction is proper. In re Mclaughlin, 443, F.2d 1392; 70 USPQ 209 (CCPA 1971)
